DSBA - Advanced

Session Agenda:

- Data exploration and visualization using essential python libraries - pandas and seaborn

Prerequisites:

- Please attend the session with a working laptop/desktop computer with Anaconda Navigator installed.
- Please download the session notebooks and have them ready during the session. This will get you up and running for the hands-on part of the session.
- Please login 5 minutes before the start of the session.
- Please feel free to raise your questions at the end of each section.

Structure of the Session:

Duration	Topic
5 min	Explanation of the session structure
15 min	Loading and checking data in python
45 min	Understanding the Statistical Summary
30 min	Grouping and Sorting data
20 min	Visualizing the data
5 min	Summary of the session

Important points to note:

- Please login 5 minutes before the start of the session.
- Please feel free to raise your questions at the end of each section.
